The fruit loaded on board this vessel in the refrigerated compartments

SZLU 985743-0

or containers

(list container number on attachment) and identified by the enclosed documents is to receive cold treatment while enroute to **TAIWAN**.

The treatment consists of two parts:

- (1) Cooling the fruit down to the selected treatment temperature.
- (2) Holding the fruits at or below the selected cold treatment temperature of the stipulated number of days

The temperature recording instrument must be in operation during the entire precooling and treatment period so as to provide a continuous record of the fruits pulp and air temperatures.

Printouts of each sensor (air and pulp) are required at least once every hour during the precooling and treatment. All equipment must be in working order when leaving the Port of Departure of the treatment will fail. **VESSELS:** both pulp and air sensor reading ***MUST*** remain within prescribed treatment schedule in order to achieve a successful cold treatment. The recording shall not be terminated until so directed by the BAPHIQ clearance official at first port of arrival in TAIWAN.

The vessel's officer, responsible for the in transit cold treatment, should continuously review the temperature record and sing the chart or log sheet at least once each 24 hour period, noting the date and time.
