```
class UploadFile : AppCompatActivity() {
    override fun onActivityResult(requestCode: Int, resultCode: Int, result: Intent?) {
        val uri = result?.data ?: return
        val originalBitmap = UtilsImage.getBitmapFromUri(context = this, uri)

        if (originalBitmap != null) {
            // Optimizamos para que no pese casi nada
            val optimized = UtilsImage.optimizeBitmap(source = originalBitmap)
            val pdfFile = File(parent = externalCacheDir, child = "upload_${System.currentTimeMillis()}.pdf")

            if (UtilsImage.convertBitmapToPdf(bitmap = optimized, destinationFile = pdfFile)) {
                mapFileAttach(input = pdfFile)
            } else {
                Utils.msj(context = this, msj = "Error al generar PDF")
            }

            // Liberar memoria RAM inmediatamente
            originalBitmap.recycle()
            optimized.recycle()
        }
    }
}
```
